

# SUCCESS STORY

Ax Perpetuum and Mantis  
inaugurate strategic partnership

m▲ntis  
an ecovium company

# Ax Perpetuum, a leading wholesaler of interior design products in Romania, has selected Mantis as its preferred WMS partner, and the award-winning Logistics Vision Suite (LVS) to streamline warehouse operations.

Ax Perpetuum is a major Romanian importer, wholesaler, and distributor of interior design products such as carpets, ceramics, wallpapers, doors, aluminum profiles, textiles, waste management solution products, and other accessories, etc. In addition to serving a wide range of hotels, restaurants, sports facilities, and other clients with a complex assortment of high-quality products, the company also provides consultancy. Along with its traditional B2B sales channel, Ax Perpetuum operates multiple online stores targeting the end users.

Ax Perpetuum, headquartered in Cluj-Napoca, deals with challenging warehousing and distribution operations because of the differentiation and high complexity of SKUs in terms of type, dimensions and catch variable units (kg., sq.m., cm. etc.). Efficient order fulfillment processes are necessary for the different business units of Ax Perpetuum to offer high customer service.

The ever-changing requirements of the various markets and sales channels served by Ax Perpetuum have prompted the company to seek a robust Warehouse Management System (WMS) with advanced capabilities and a proven track record in vertical sectors such as home improvement, construction materials etc.

Ax Perpetuum selected the internationally leading Mantis WMS Logistics Vision Suite (LVS), because of its rich functionality, true adaptability, and unique flexibility. Ax Perpetuum also opted for Mantis WMS software for its scalability and upgradeability, thus capable of supporting business growth by smoothly and rapidly accommodating new flows in the future.

Apart from optimizing major warehouse activities, the Mantis Romania team of experts who implements the project also covers specific requirements such as the safety of the products with good packing, item management, traceability, reporting, diverse measuring units etc.

After the implementation of the initial distribution center, both Mantis and Ax Perpetuum are looking forward to expand the project scope and roll out to other operations and warehouses in Romania.

By optimizing its warehouse processes with WMS LVS, the company aims to increase productivity and order accuracy, while enhancing customer service level.

“We are excited to start our collaboration with our strategic WMS partner, Mantis. We are confident that the Logistics Vision Suite (LVS) will help us optimize our warehouse operations and enhance efficiency. We look forward to a successful co-operation and its positive impact on our business.”

Andrea Gergely, IT Manager, Ax Perpetuum
